FLEXITEEK

The *specialists* for marine fendering

Wilks is proud to be one of the world's leading companies in the manufacture and supply of impact protection and decking systems.

Since 1973 we have supplied many leading boat builders with their profiles and our customer base spans the globe.

We manufacture a wide range of fendering profiles for both boat and pontoon applications as well as accessories for other marine users including Flexiteek, the original synthetic teak decking for boats.

At our premises we hold a vast stock of profiles in flexible PVC, rigid PVC, stainless steel, aluminium and rubber; but as manufacturers we can also supply to meet your individual trade requirements.

BUMP!

Real Protection with Style

Great looking fendering that's quick and easy to fit with no front fastenings!

Available in a black, white or traditional wood effect finish.
